

➔ Start by using a long bolt to attach the **wings** and **undercarriage** to the **fuselage**. Finally, add the **tail plane**.

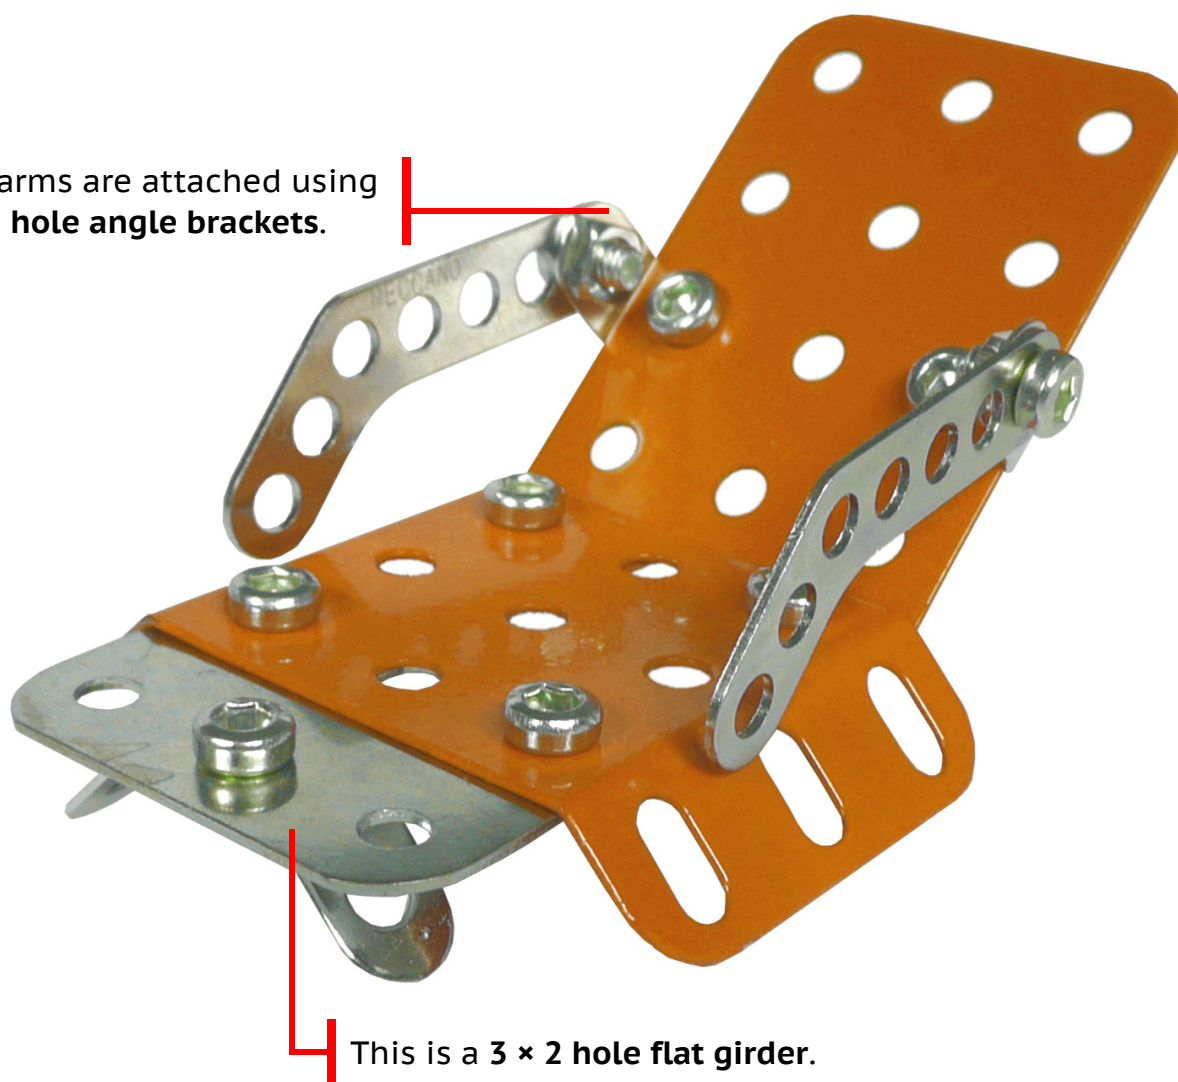

💡 Have a go at adding a propeller to your aeroplane.

This model uses parts from the **Off Road Set**, part of the **Meccano Evolution** range available from good toy shops and online retailers.

- ➔ Start by building the **bed**, then attach the **arms**.
Finally, add the front **feet**.

The arms are attached using
1 × 1 hole angle brackets.

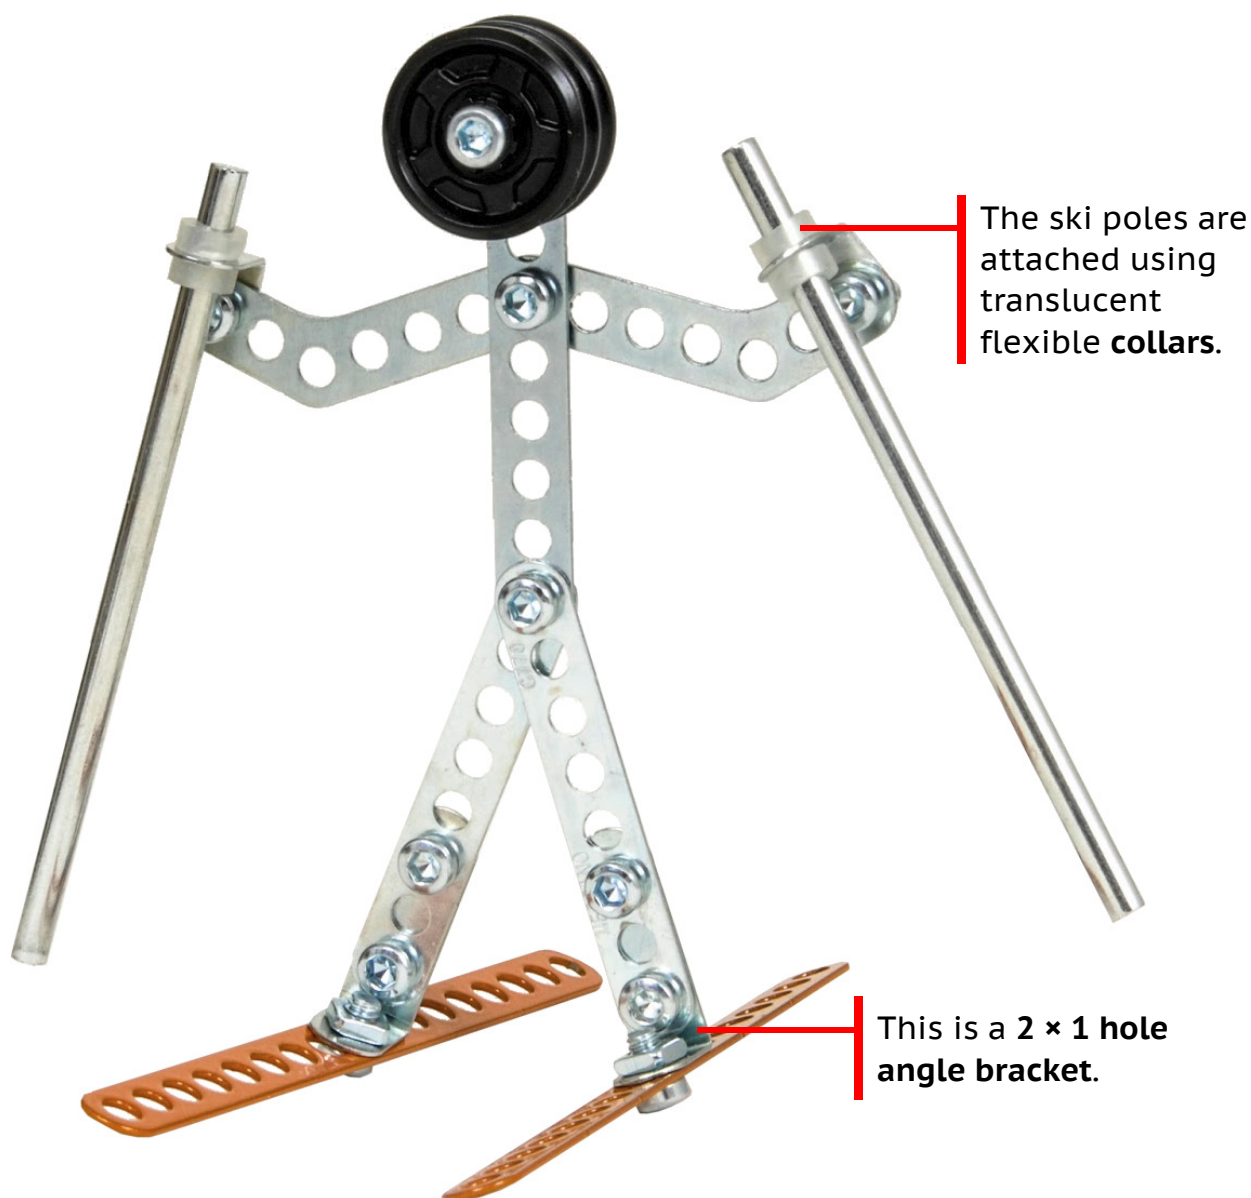

This is a **3 × 2 hole flat girder**.

This model uses parts from the **Off Road Set**,
part of the **Meccano Evolution** range available
from good toy shops and online retailers.

➔ Start building from the **skis** and work upwards.

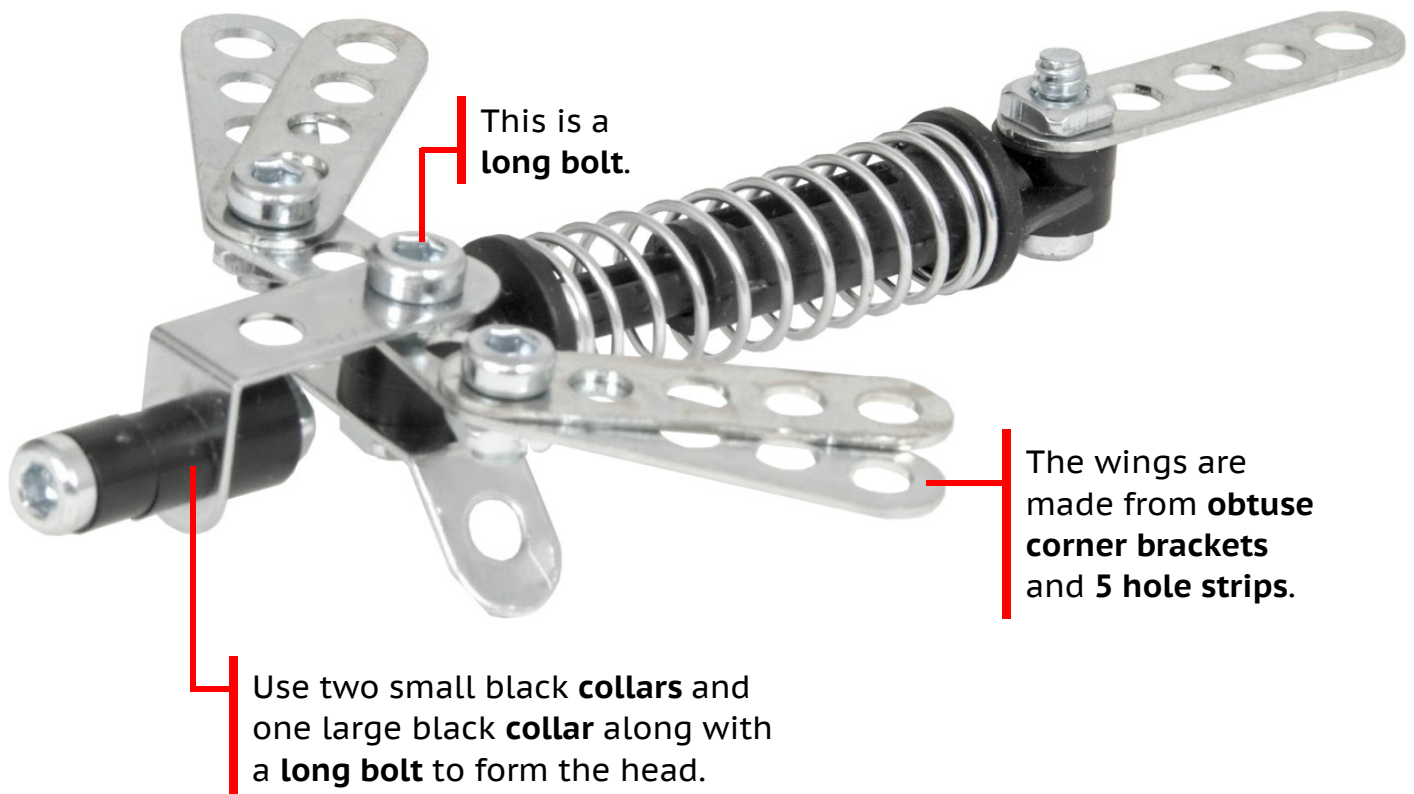

💡 Have a go at making the skier's limbs move freely without working loose (hint: look for some special nuts).

This model uses parts from the **Off Road Set**, part of the **Meccano Evolution** range available from good toy shops and online retailers.

➔ Start by building the **head**, then attach it to the **body** and **wings** using a long bolt. Finally, add the **tail**.

💡 Have a go at adding antennae or extra legs to your bug.

This model uses parts from the **Off Road Set**, part of the **Meccano Evolution** range available from good toy shops and online retailers.
